**1.4.3 - Does your university as a body organise training or programmes to improve access to basic services for all?**

The Imam Ja'afar Al-Sadiq University offers training and essential information to help local populations live a healthy and sustainable lifestyle. This may be divided into two categories of projects, as follows:
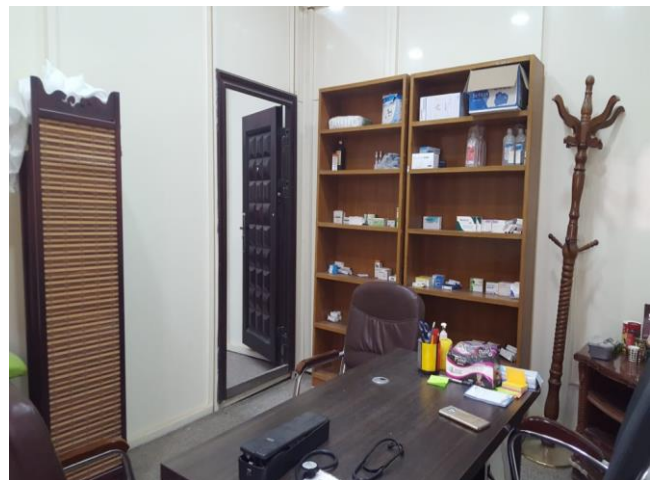

1. **A project to Advance Education:** The teaching and learning management programs of Imam Ja'afar Al-Sadiq University are its main areas of emphasis. Since it seeks to better the future while conserving history and culture, Imam Ja'afar Al-Sadiq University is committed to providing its students with excellent education, opportunities for life-long learning, and unique campus experiences. It is dedicated to producing strong leaders who serve their communities and the future of humanity, leaders who bridge the gap between local and global affairs. The initiatives in this field have been carried out because Imam Ja'afar Al-Sadiq University holds the view that "Education is power."

2. **Project for Promoting Health:** Imam Ja'afar Al-Sadiq University works on providing high-level health services with comprehensive service support for all the students, staff, and the local community as follows:

   1. Ensure that each branch of the university has a Clinical Health Room that can efficiently provide health care for the entire academic community.

   2. The university provided ambulance wheels in each branch of the university for the rapid response of emergency medical cases inside the university.

   3. The university is keen to conduct many training courses and workshops to educate students and academic staff about a range of diseases and

how to deal with them. In addition to how to conduct first aid to help others.

4. The university is also keen to conduct many dusting campaigns periodically during the year to reduce the spread of epidemics and infectious diseases and provide a healthier study environment. The dusting campaigns are carried out at particular intervals when the room is unoccupied. During the process, the door is closed and information is displayed to users outside.

5. The university, in cooperation with the health centers nearby, also worked to provide the necessary vaccines for both students and employees during the period of the Corona pandemic.

6. It also works to provide financial and moral support to motivate researchers and students at the university to publish many academic papers in all scientific and health fields in particular. For instance, one of the teachers in the College of Information Technology obtained an invention in the design and development of prosthetic limbs.

**Clinical Health Room (Imam Ja'afar Al-Sadiq University, Iraq).**

**Examples of health infrastructure facilities for students and academic and administrative staff wellbeing (Imam Ja'afar Al-Sadiq University, Iraq).**
