

2.12 Responsible Consumption and production (SDG 12)

Imam Ja'afar Al-Sadiq University starts with waste reduction at the source, green procurement, resource recovery, and hazard prevention in order to achieve responsible consumption and production. Imam Ja'afar Al-Sadiq University cooperates with the local municipal department on implementing Waste treatment and recycling activities, allowing students and staff to easily determine what they can and cannot recycle. All the branches of the university are working very hard to become waste reduction and recycling models for other institutional waste generators in the country. Furthermore, Imam Ja'afar Al-Sadiq University applied and sponsored a program that aims to:

1. Creating a clean university environment and moving to areas outside the university campus.
2. Organizing the treatment, storage, and disposal of hazardous waste.
3. The disposal of waste that cannot be recycled.
4. Recycle materials that can be recycled.
5. Using classified container packages to sort waste according to its categories, taking into account the presence of signs indicating the type of waste.
6. Holding a number of workshops and training courses periodically to motivate students, Visitors, staff, and academics to understand the terms of recycling and processing.
